Office Action Summary	Application No. 10/800,759	Applicant(s) ANDO ET AL.	
	Examiner HUY T. NGUYEN	Art Unit 2621	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 16-19 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 16-19 of US Patent No. 6,618,550 in view of Mori et al (6,219,488).

The difference between claims 16-19 and claim 2-3 of US Patent No. 6,618,550 is that the medium of claims 16-19 recite that the additional audio information having an address information that is not found in claims 2-3 US Patent No. 6,618,550. However it is noted that providing address information for audio information as well known in the art taught by Mori (Fig. 20). Therefore it would have been obvious to one of ordinary skill in the art to modify claim 2-3 of US Patent No. 6,618,550 by providing

Art Unit: 2621

address information to the additional audio recited in claims US Patent No. 6,618,550 to accurately access the audio information and to produce claims 1 of the present application.

Further for claims 16-19 of the present application, claims 2-3 of US Patent No. 6,618,550 as modified with Mori further teaches recording and reproducing means for recording and reproducing the still picture information and management information from a first area and a second area. Since Mori teaches an apparatus having means for recording and reproducing still picture audio information and control information used for access the still picture information on the medium and claims 2-3 of the present application teaches recording and reproducing the still picture information and control information on and from a first area and a second area of a medium.

3. Claims 16-19 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 16-18 of copending Application No.10/800,758 in view of Mori et al.

The difference between claims 16-19 of the present application and claims 16-19 of copending Application No.10/800,758 is that claims 16-19 of the present application additionally recite that the additional audio information having an address information that is not found in claims 16-19 of copending Application No.10/800,758 . However it is noted that providing address information for audio information as well known in the art taught by Mori (Fig. 20). Therefore it would have been obvious to one of ordinary skill in the art to modify claims 16-19 of copending Application

No.10/800,758 by providing address information to the additional audio recited in claims copending Application No.10/800,758 to accurately access the audio information and to produce claims 16-19 of the present application.

This is a provisional obviousness-type double patenting rejection.
